

POLI MIRTILLO (Blueberry)

The blueberries (Vaccinium Myrtillus) are appreciated for their sight-regenerating properties, so much that they are a very important element in the pilots' diet.

We would like to be able to attribute the same virtues to this Grappa-based liqueur with blueberry infusion, which instead, if drunk in excess, rather than improving eyesight, probably blurs it!

MIRTILLO (Blueberries)

Grappa-based sweet liqueur with natural infusion of blueberries.

Its intense aroma recalls a basket with fresh blueberries and juicy wild berries.

Lively as the blueberry jam spread on toasted bread for breakfast.
